EDUCATION

Indira Gandhi Delhi Technical University for Women

Bachelor of Technology in Computer Science, Specialization in AI

Sarvodaya Kanya Vidyalaya

Nav Jeevan Senior Secondary School

CGPA: 9.13/10

Aug 2024 – May 2028

XII (CBSE), **95%**

X (CBSE), **94%**

EXPERIENCE

DRDO Intern – CFEES

June 2026 - July 2026

Software Development Intern | Certificate | Github

- Developed an **Employee Management System** with **React.js**, **Python**, and **SQL**, featuring **10+ modules**.
- Implemented **authentication**, backend APIs, and SQL database integration using **Python**, enabling secure **role-based access** and efficient data management.

Summer Intern, IGDТУW

June 2025 - July 2025

AI Powered Full Stack Development Intern | Certificate

- Developed React-based web applications with reusable components and REST API integration.
- Built a machine learning model for **Parkinson's disease detection** using **190+ samples**, evaluating LR, RF, XGBoost, and SVM to achieve **87.18% accuracy** with SVM.

SKILLS

Programming Languages: C++, Python, Java, R, SQL

Problem Solving: LeetCode (400+ problems solved)

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks

Web Development: HTML, CSS, JavaScript, React.js, Next.js, Tailwind CSS

Libraries & Tools: Pandas, NumPy, TensorFlow, Matplotlib, Git, VS Code, Jupyter Notebook, Google Colab

AI/ML: Machine Learning, Deep Learning (CNN), Data Preprocessing, Model Evaluation

PROJECTS

Mapping Water-Logging Hotspots of Delhi | *React.js, Leaflet.js, Python, Scikit-learn*

[GitHub](#) | [Live](#)

- Built a **GIS-based flood-risk analysis system** by collecting and integrating data from multiple **public sources** to map and analyze **50+ water-logging hotspots** across Delhi.
- Trained a **Random Forest** model to predict **flood-risk levels** using integrated geospatial and environmental data.
- Integrated **drainage data**, **heatmaps**, **rainfall** and **real-time rainfall updates**, with priority scores and rule-based government recommendations for each location.

TrustPulse-Merchant & Product Risk Engine | *React.js, Flask, Python, Scikit-learn, SQLite*

[GitHub](#)

- Built a **risk engine** scoring **60+ merchants** and **300+ products** using ML classification and anomaly detection.
- Applied **LR**, **RF**, **SVM**, **XGBoost**, and **Isolation Forest** for fraud detection and behavioral anomaly analysis.
- Developed a **React + Flask dashboard** with role-based authentication, live risk simulation, alerts, and a **geospatial risk map**.

Plant Disease Detection using CNN | *Python, TensorFlow, Gradio*

[GitHub](#)

- Built and trained a CNN using TensorFlow on the PlantVillage dataset (54k+ images, 38 classes) with image preprocessing and normalization.
- Achieved **87.12% validation accuracy** and deployed the model via a **Gradio web interface** for real-time predictions.

ACHIEVEMENTS

- Selected as an **SIH Internal Round Finalist** for proposing a platform to showcase Sikkim's monasteries for tourism and cultural preservation, among **200+ teams**.
- **Research paper accepted at ICOIICS 2025:** "Voice-Based Detection of Parkinson's Disease Using Machine Learning Techniques."
- Selected as a **Semi-Finalist in Flipkart GRID 8.0**.
- **TVS Credit E.P.I.C 8.0** — Selected among the Top 400 candidates from 70,000+ participants through a competitive selection process.
- **Core Member — Finivesta | Neutron | CodeBenders:** Designed impactful visual content and merchandise that strengthened brand identity and promoted events across social media and LinkedIn.
