EDUCATION

Indira Gandhi Delhi Technical University for Women

Bachelor of Technology in Computer Science, Specialization in AI

Central Board of Secondary Education

Senior Secondary

Central Board of Secondary Education

Secondary

SGPA: 8.81/10

2024 – 2028

95%

2024

94%

2022

EXPERIENCE

Summer Intern, IGDTUW | [Link](#)

June 2025 – July 2025

AI Powered Full Stack Development

- Developed **3+ React.js applications** with secure authentication, dynamic routing, and modular components.
- Integrated REST APIs to enable real-time data fetching and improve performance by **25%**.
- Optimized UI using client side validation and theme toggling, increasing usability and user engagement by 20%.

SSOC Season 4 (SSOC '25)

June 2025 – Sep 2025

Open Source Developer

- Selected from 100+ applicants for an open source program; delivered many production level features and bug fixes.
- Collaborated with mentors using Git based workflows, improving code quality and issue resolution by 20%

SKILLS

Programming Languages: C++, Python, Java, R

Problem Solving: LeetCode (200+ problems solved)

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, DBMS

Web Development: HTML, CSS, JavaScript, React.js, Tailwind CSS

Libraries & Tools: Pandas, NumPy, TensorFlow, Matplotlib, Git, VS Code, Jupyter Notebook, Google Colab

PROJECTS

Mapping Water-Logging Hotspots of Delhi | *Leaflet.js, OpenStreetMap, GeoJSON*

[GitHub](#) | [Live](#)

- Mapped **50+ water-logging hotspots** across Delhi using a GIS web app (JavaScript, Leaflet.js).
- Integrated **2+ geospatial datasets** with **interactive heatmaps and toggles**, reducing flood-risk analysis time by **40%**.

AI Fitness & Nutrition Planner | *JavaScript, REST API, Chart.js*

[GitHub](#) | [Live](#)

- Built an AI-driven web application delivering **50+ meal plans** and **100+ workouts** personalized to goals.
- Implemented **REST APIs** to process data from **1,000+ food items** and visualized progress using **interactive dashboards** (BMI, weight, calories).

Plant Disease Detection using CNN | *Python, TensorFlow, Gradio*

[GitHub](#)

- Engineered and trained a Convolutional Neural Network on the PlantVillage dataset (54k+ images, 38 classes).
- Achieved **87.12% validation accuracy** and deployed the model via a **Gradio web interface** for real-time predictions.

ACHIEVEMENTS

- Selected for **Smart India Hackathon (SIH) 2025**, cleared Round 1 among national-level entries.
- Research paper accepted: “Voice-Based Detection of Parkinson’s Disease Using Machine Learning Techniques”, 4th International Conference on Intelligent Computing, Information and Control Systems (ICOIICS), 2025.
- Selected twice for **EMC**, a school-based startup initiative, among 100+ applicants.
- Ranked **1st** in Grade 12 among all sections.
- Core Member** — **Finivesta** | **Neutron** | **CodeBenders**: Designed impactful visual content and merchandise that strengthened brand identity and promoted events across social media and LinkedIn.
